

Ecclesall Kids Club

5.6 Cleaning of Bodily Fluids Policy

If any bodily Fluids e.g. Blood, vomit, urine or excrement are spilled, Ecclesall Kids Club staff will maintain high standards of hygiene and appropriate precautions are to be taken to prevent contamination or infection of our staff and children.

When cleaning bodily fluids, attention must be given to hygiene even if it is felt to be a low risk. Any soiled items will be bagged to go home - staff will not rinse them.

The area must be kept clear of staff and children. The staff cleaning up the spillage must use disposable gloves and apron along with appropriate cleaning materials for the spillage. The spillage will be covered initially and wet floor signs positioned around the area. The spillage, cleaning materials and protective equipment must be double bagged and disposed of in a suitable bin out of the club area. Contaminated clothing should also be removed ready for cleaning and stored in a sealed bag and clean clothes borrowed from club.

Process for cleaning Spillages:

Activity: Cleaning Bodily Fluids away from a person

What you need: Single use disposable gloves, single use Apron, paper towels, a bin bag and appropriate cleaning materials, wet floor sign
